

Do You Have Trouble Breathing?

Discover the Pulmonary Rehabilitation Program Center for Asthma, Allergy & Respiratory Disease

Nationally-Recognized Leader in Research & Innovation

"I am a life-long asthmatic who was prone to numerous life-threatening infections. Dr. Windt got my health under control and prescribed pulmonary rehab. I am now in the best shape of my life. The rehab program is a total fitness approach, working on strength, core, flexibility and overall lifestyle. I feel great; I no longer get fatigued and in 2017, I became the national champion in discus for my age group. Not bad for age 81!"

— Steve Holmes
